

What Teachers Say about e-Learning KY Courses:

"It is one of the few professional development opportunities I've had as an educator that allowed me to develop materials that were specific to my actual teaching and that could be used immediately in the classroom. I cannot express how convenient it is to work on the professional development at one's own time and pace - it was far more relaxed, allowed time for reflection, and enabled me to think on topics and pose questions for feedback from my peers." -Karen West

"I found this course to be one of the best online courses that I have ever taken. The readings were excellent and the links helpful. Although I teach elementary students, I was able to alter the strategies presented and use them with my younger students. I can't say enough about our facilitator... The course was a wonderful experience --- worthy of an award!" -Sonya Anglin

"I especially love the flexibility of completing a course online (as I truly am in my PJ's)." -Elizabeth Erwin

"All of my facilitators have been fantastic. I'd like to express my appreciation to whatever group provides the funds for Kentucky teachers to explore learning this way."
- Rhonda Orttenberger

"I love to read and the online material was so interesting and really gave so many sources of help and so much material we could use. I would take internet courses again if I could access half as much material. Thank you so much for developing these courses."
- Lynn Miller

"By working at it a little at a time, it was not overwhelming. I really enjoyed it and learned a great deal of things for the future!"
- Lelee

"I think this is a fantastic way to share info with other teachers and do PD as well."
- Danny

"The resources offered with this class are phenomenal! I have wanted to view every video, watch every PowerPoint, and read all the sources."
- Susan J. Brown

"I can't say enough for the layout of this program. This has been such an informative class. I love the communication between all the students."
- Donna Brock

"I am a member of the school literacy committee and will actually be presenting material from this course to the teachers tomorrow."
- Diane Wright

"I feel that I got more out of this than the traditional PD's I have had in the past. This type of PD requires you to be an active participant instead of just sitting in a room all day listening to a presenter talk about something you may or may not be interested in or able to use."
- Linda Begley
